1440
EPA 860mg & DHA 580mg
COLD WATER FISH OIL
WITH TOCOPHEROLS

The health benefits of long-chain polyunsaturated fatty acids eicosapentaenoic acid (EPA) and docosahexaenoic acid (DHA) are well known and documented. Oily fish offer excellent sources of EPA and DHA, however, recent news stories have raised concerns about the levels of environmental contaminants found in certain fish. Ultra Pure Omega3 1440™ concentrate, through the PureMax® system offers a solution by providing high levels of EPA and DHA in ultra-pure form. Sourcing sardines and anchovies from unpolluted waters. These smaller fish naturally contain lower levels of environmental contaminants. The PureMax® state-of-the-art processing, including GMP molecular distillation and proprietary purification technology, reduce the levels of trace impurities still further, to the limits of analytical detection. Ultra Pure Omega3 1440™ offer maximum strength cold water fish oil in an ultra pure concentrate.

NUTRITION • DESIGNED FOR LIFE™

**ULTRA PURE • MAXIMUM STRENGTH
EPA 860mg & DHA 580mg**

Ultra Pure Omega³ 1440™ is cutting edge Essential Fatty Acids (EFAs). Because our bodies do not manufacture EFAs on their own, **Ultra Pure Omega³ 1440™** provides these "necessary for life" fatty acids that have been shown to be deficient in the "standard American diet." EFAs have been shown to have a profound effect on the production of prostaglandins. EFAs support healthy blood circulation, normal blood pressure, may reduce inflammation and help balance bodily fluids. EFAs promote optimal cardiovascular, skin, nervous system and immune health. They are necessary for maintaining bone health, regulating your metabolism and to maintain reproductive capabilities. Omega-3's EPA (Eicosapentanoic Acid) and DHA (Docosahexanoic Acid) are the main components of the brain's neurons and all cell membranes.

Ultra Pure Omega³ 1440™ utilizes the PureMax® system, which uses a proprietary engineering technology to concentrate and purify lipids to exacting standards over a minimum of three molecular distillation steps. PureMax® offers a 99.6% typical reductions in levels of dioxin-like PCBs and impressive increases in omega-3 concentration.

Suggested Usage: Take 2 softgels up to 3 times daily with food, or as directed by your qualified health care provider. Store in a dry, cool place.
