Antioxidants are scavengers that neutralize free radicals that cause cell and tissue damage that leads to disease. Unfortunately, our bodies don't produce on their own enough antioxidants to use in the fight against free radicals, so we need a little outside help. The antioxidants you find in Natural Reds 3000™ may be just what the doctor ordered. Here are just a few of the benefits:

Pomegranates are loaded with polyphenols, potent plan antioxidants. Working as an antioxidant "super" powerhouse, they help neutralize those unstable little molecules that cause many diseases and accelerate aging, the free radicals. By neutralizing the free radicals, you help your body prevent cell and tissue damage, which leads to premature aging and diseases, such as cancer and heart disease.

Packed with Pomegranates, Blueberries, Gogi Berries, and naturally sweet!
